TREATMENT
HELPS IN BALANCING BLOOD PRESSURE
ACTS AS ANTIFUNGAL AND
ANTIBACTERIAL
REGULATES SUGAR
MOOD ELEVATOR
RICH IN ANTIOXIDANTS

Graviola leaves and Bark, Simaruba leaves, Ashwagandha

Graviola, also known as soursop or Brazilian paw paw and is hailed as a wonder herb. Graviola increased T cells. T cells are lymphocytes in the body that kill cancer cells and other damaged cells. More importantly, graviola is an "annonaceous acetogenin." In the simplest terms, this means it has antitumorous and antiprotozoal capabilities. Its antitumorous properties are most notable because they assist in shrinking tumors. These include: Tannins, saponins, phytosterols, flavonoids, anthraquinones. Graviola may help people regulate their blood sugar if they have diabetes.

Simaruba is known to be an effective remedy for inflammation of the colon. This amazing green medicine also kills leukemia cells, reduces tumor growth, destroys both bacteria and viruses, promotes menstruation, and reduces pain and fever.

Ashwagandha is one of the most important herbs, a form of alternative medicine based on Indian principles of natural healing. Ashwagandha may reduce blood sugar levels through its effects on insulin secretion and sensitivity. It promotes the death of tumor cells and may be effective against several types of cancer.

Recommendations

Brewing instructions: boil 1 tsp in a cup of hot water for 8-10 minutes and strain only if required.

Minimum recommendation of 1 cup a day in the first half of the day.
